

# AREIOS

Gaming Headset

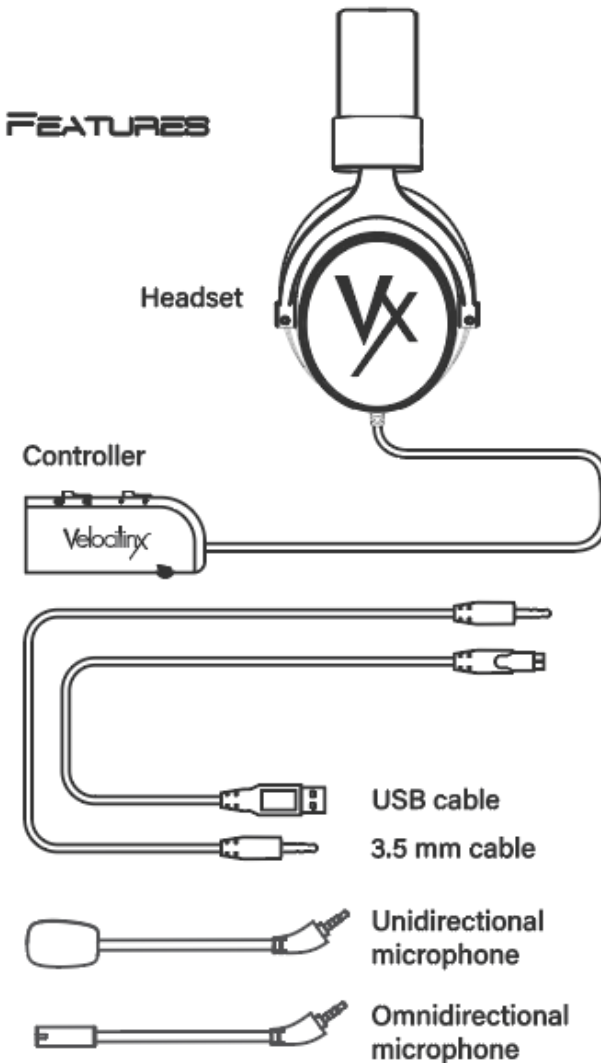

The Areios is a gamer-ready universal headset for PC and consoles. Large 53mm drivers in the speakers provide crisp, clear sound. Two optional microphones are included ensure players hear your every word. The Prism Lighting effects add a stylish ambience to this lightweight, comfortable headset.

Part number: VXGM-HS71S-35RU-DC

Velocilinx

## FEATURES

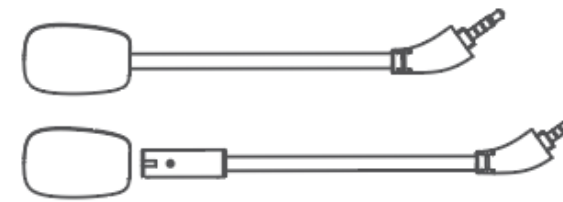

PAGE 2

## OPERATION

### Microphone

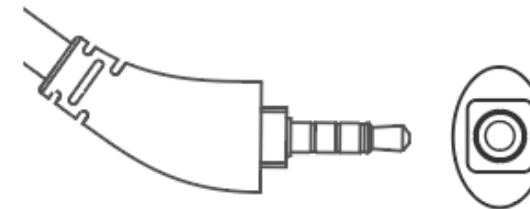

Choose the microphone to use:

**Unidirectional** will pick up sounds only directly in front of the microphone. It has a foam cover on it.

**Omnidirectional** will pick up ALL sounds around the microphone.

Plug the chosen microphone into the headset, aligning the oval notch for proper orientation.

## OPERATION (Continued)

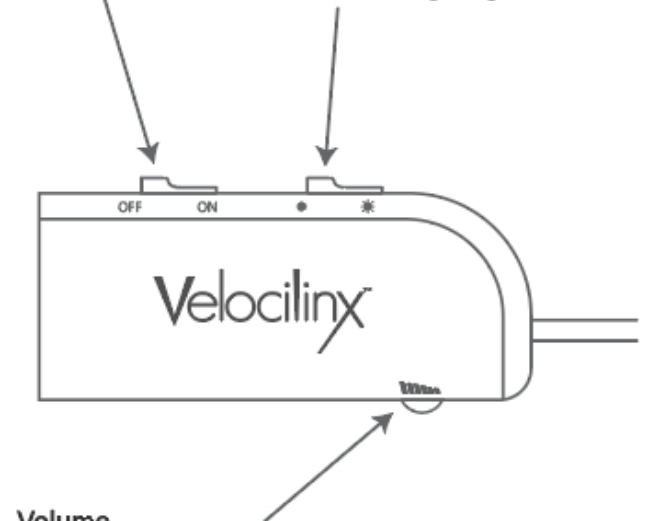

### Controller

#### Microphone

This slide switch mutes the microphone.

#### Lighting

This slide switch turns the Prism Lighting On/Off if the headset is plugged in by USB. If using the 3.5mm cable this switch has no function since there is no lighting in that mode.

#### Volume

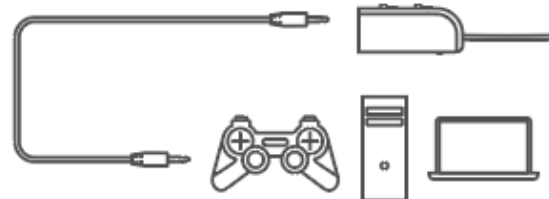

This rotating switch controls the headset volume.

## OPERATION (Continued)

### Cables

Select only one cable, do not use both cables at the same time.

**3.5 cable:** Plug into a 3.5 mm jack on a game controller or sound port(s) on a computer (desktop or laptop). When using this cable, the Prism Lighting effects are not available.

**USB cable:** Plug into a USB port on a gaming console or computer (desktop or laptop). When using this cable, the Prism Lighting effects can be on or off.

Plug the cable into the control box on the headset.  
You are all set.

PAGE 5

## TROUBLESHOOTING

### No sound

1. Unplug the cable from the game console, game controller, or computer (desktop or laptop).
2. Unplug the cable from the control box
3. Wait 15 seconds
4. Plug the cable back into the control box
5. Plug the cable back into the game console, game controller, or computer (desktop or laptop).

### No lights

1. Make sure the USB cable is being used.
2. Make sure the light is turned on at the control box.

### Microphone does not work

1. Make sure the microphone is completely seated into the headset. The base of the microphone is oval and so is the slot in the headset.

If the trouble shooting suggestions above do not solve the problems, please visit the Velocilinx website to get more information or call us at our live support number.
